Objective

Cybersecurity student focused on hands-on technical skills, including network security, vulnerability analysis, and system defense. Seeking an entry-level role where I can actively work with systems, identify threats, and build real-world security experience.

Education

Full Sail University — Orlando, FL
Bachelor's in Cybersecurity
Expected Graduation: 5/2026

Technical Skills

Networking: TCP/IP, DNS, DHCP, VPNs
Tools: Wireshark, Nmap, OpenSSL, Splunk (basic)
Security Concepts: Vulnerability Assessment, Threat Analysis, Access Control
Systems: Windows, Linux
Frameworks: NIST, CIS Controls

Projects / Hands-On Experience

Network Traffic Analysis Lab

- Used Wireshark to capture and analyze network traffic
- Identified suspicious packets and explained potential threats

Vulnerability Scanning Project

- Performed scans using Nmap to identify open ports and services
- Analyzed potential weaknesses and recommended mitigations

Cybersecurity Case Study (SnowBe Online)

- Evaluated security gaps in a simulated company environment
- Applied NIST and PCI DSS concepts to improve system security

Certifications

CompTIA Security+ (In Progress / Completed)

Experience

Automotive Detailing Specialist — Ceramic Pro Charlotte

6/21— 1/22

- Attention to Detail – Noticing small imperfections, stains, or defects and correcting them
- Time Management – Completing jobs efficiently while maintaining quality
- Consistency & Precision – Following step-by-step processes without cutting corners
- Quality Control – Inspecting finished work to meet high standards

Additional

Strong interest in hands-on cybersecurity roles (SOC, blue team, pentesting)

Continuously learning through labs, coursework, and self-study
